

INTRODUCING

R*LAP

STEEL STRONG

Robin Buildings' new steel siding, R*LAP, is the result of intensive R&D for two years and is only available from Certified Robin Buildings dealers. The upgrade to steel replaces our aluminum siding and delivers these *head-turning* features:

R*LAP IS STRONGER & REQUIRES LESS MAINTENANCE

- Heavy Duty "Residential Grade" Steel is the same thickness as residential roof steel.
- Walls are more impact resistant and hold up to strong winds and wind-borne debris.
- Larger panel size means panels are wider, stronger and walls have fewer seams.
- Looks great: finer detail and steel profile matches residential siding.

COLOR & RUST WARRANTY

- R*LAP is coated twice: once with Zinalume® coating for rust protection and then with a quality paint for long-lasting colors. R*LAP siding comes with a 25 year rust thru warranty and a 10 year warranty against paint cracking, chipping or peeling.
- R*LAP offers a longer life and less maintenance than wood.

STANDARD SIDING COLORS AVAILABLE

- Light Stone
- White
- Light Grey
- Tan
- Clay

*Ask to see and feel
the difference!*
